

Belt Conveyor

ONE SOURCE • ONE SOLUTION

Lambton Machinery (Zhengzhou) Ltd. uses CEMA Standard, CAD, CAM and CNC Technology, offering special conveyor designs for different industries.

Lambton's Belt conveyor is widely used in grain, food, seed, beer and other beverages, pesticides, tailings, chemical engineering, coal, port and other industries. It's capacity can be up to 1500t(wheat)h or 100t(malt)h.

Drum Belt Conveyor Features:

- Advanced technology in drum design ensures smooth running and long life span.
- Many kinds of drum combinations for different material
- Conveyors with large capacity and length use large drum, cushion drum and regulating drum ensuring safe running.
- Can meet requirement of no breakage and low residue level, applicable to seed, grain and oil industries.
- Optional conveyor structures: The complete close, semi-close and open style.
- Portable and fixed type are available for both level and inclined conveyor.
- Assembled type and easy erection.

Air Bed Belt Conveyor Features:

- International advanced drum, air chamber design and manufacture skills ensures safe and smooth running.
- Stiffened belt.
- Specially suitable for outdoor work, no additional safe guard device is needed.
- Assembled type and easy erection.
- Portable and fixed type are both available
- With perfect environment protection feature

We manufacture a wide range of material handling and grain storage equipment. Visit our website or consult a dealer for additional information!
