

## PRODUCTS & SERVICES

### PROJECT PLANNING & EXECUTION

Our team of experienced professionals will work with you to understand your project goals and objectives, identify potential roadblocks, and create a comprehensive plan to ensure success.

### CUSTOM CONVEYORS & ACCESSORIES

We are a company that designs, builds, and installs custom conveyor systems and accessories that are specially made to suit the needs of any industry. Our team has years of experience and expertise in creating simple or complex systems that will streamline your production processes and increase efficiency. We also offer a variety of conveyor accessories to ensure the smooth operation of your system, such as drives, sensors, and inlet/discharge gates.

### GRAIN BINS & FEED TANKS

Lambton Conveyor is a reliable brand that offers top-notch grain handling solutions, such as advanced grain bins. These bins are strong and long-lasting, using premium quality materials and innovative engineering methods. Along with this, the brand offers tailor-made grain bin designs to cater to individual client requirements.

## ABOUT US

Family owned since 1965, Lambton is Canada's leading manufacturer of grain storage, handling and conditioning systems.

Our 200,000 sq. ft. headquarters in Wallaceburg, Ontario, is home to engineering, production and support resources serving international farms, grain marketers, food processing and feed manufacturing industries.

Lambton is rooted in the rich southern Ontario farmland of the Great Lakes region. Today, with international manufacturing facilities and a global network of field representatives, we continue to value our close personal connection with customers and associates around the world.

# GRAIN SOLUTIONS

DESIGNED FOR YOU  
BUILT FOR YOU  
SINCE 1965

## WHY CHOOSE US

Our modular design principles allow us to tailor each assembly to meet your specific process requirements. Our team of factory-trained field consultants, located worldwide, can collaborate with you to create, construct, and maintain a grain system that is perfectly suited to your operation. These principles also streamline the installation process, ensuring that all components seamlessly work together and integrate smoothly with your existing equipment.

Work with Lambton and see how our engineering and support team is committed to giving you the most productive and most cost-effective solution, from the factory to the farm. Our design team is constantly expanding our range of Lambton-built components and accessories to achieve the best delivery and costing for our customers.

## WHAT WE DO

There is more to a grain storage system than bins and conveyors. Lambton's more than 50 years experience can make all the difference.

Lambton is the one source that brings together all the components your system will need, plus the engineering and service support to make sure it all works together, your way.

We design and manufacture the complete range of grain storage, grain handling and grain conditioning equipment:

- Bucket Elevators
- Chain Conveyors
- Grain Loops
- Grain Cannons
- Flow System Accessories
- Bin Dryers
- Cleaners

## PRODUCTS

GRAIN CANNON

BUCKET ELEVATOR

DUAL INLET PENDULUM DISTRIBUTOR

FLAT BACK DISTRIBUTOR

INCLINE CONVEYOR

GRAIN LOOP

## LAMBTON SOLUTIONS ARE BUILT TO LAST

We use only galvanized steel as our standard to deliver long service life, a low-maintenance finish and the best total value in the industry today. Our FEA testing systems and robotic manufacturing maintain the highest consistency for our renowned quality standards.

Whether you're building your grain systems from the ground up, expanding your current facility or simply upgrading your equipment, Lambton is the one source that's ready and able to do things your way.
