

**BELT CONVEYOR STANDARD FEATURES****COMPACT SIZE**

- The GrainWay Belt Conveyor's compact design allows for it to easily fit under bin floors (minimum height 12")

**HIGH CAPACITIES**

- 12" belt unloads up to 5000 BPH, 18" belt up to 7500 BPH and 24" belt up to 10,000 BPH

**GENTLE HANDLING**

- Slow speeds, rubber belting, and a plastic deflector inside the discharge allows for gentle handling and prevents grain from being damaged

**HEAVY-DUTY CONSTRUCTION**

- GrainWay Belt Conveyors are built to last with bolted construction, a 10 gauge steel frame, rubber belting, and a 1 1/4" bearing all standard
- Galvanized and powder coated options both available

**EASY MAINTENANCE**

- Bolted construction and removable cleaning covers make for easy cleaning and maintenance

**ELECTRIC DRIVE AS STANDARD**

- Speed is adjustable based on pulley size
- Direct drive reducer for lower speeds

**BELT CONVEYOR OPTIONAL FEATURES****HYDRAULIC DRIVE KIT**

- Comes with orbital motor, direct drive coupler, and safety covers

**WHEEL ASSEMBLIES**

- Comes in a 15" model (to raise from 0" to 15") and a 27" model (to raise from 15" to 27") with a Bulldog jack to allow you to raise/lower the conveyor to the correct height.

**BIN ACCESSORIES**

- Bin brackets, bin bracket covers, pull box assemblies, slide gates, center wells, side wells

**RUBBER SKIRTING**

- Bolted to the side of the conveyor to provide a tight seal under aeration floors
- Used on portable conveyors for a tight seal

## FLAT CONVEYORS

- Ideal for both agricultural and industrial solutions
- Capacities up to 10,000 BPH
- Conveniently fits under bin floors, hopper bins, drive over pits, and a variety of other applications
- Mobile option with wheel kit available

## INCLINE CONVEYORS

- Ideal for both agricultural and industrial solutions
- Capacities up to 5,000 BPH
- Conveniently fits under bin floors, hopper bins, drive over pits, and a variety of other applications
- Incline of up to 45 degrees for extra discharge clearance
- Mobile option with wheel kit available

## DRIVE OVER PIT CONVEYORS

- Ideal for both agricultural and industrial solutions
- Capacities up to 10,000 BPH
- Easy way to simplify the loading and unloading process
- Pit components include a funnel system with a hat for adjustment of grain control, heavy grating, and two heavy duty steel side plates
- A heavy mat is used on top of the grate to limit contaminants

## CLEATED BELT CONVEYORS

- Ideal for both agricultural and industrial solutions
- Features a raised inlet to allow material to settle on the belt
- Useful for steep inclines where roll back is an issue
- Paddles spaced 6" to 12" apart depending on product, angle, and belt speed
- Side mount motor and gear reducer to vary belt speed as needed
